TABLE OF CONTENTS

[No. 269, MARCH 1965]

PAGE

Bye-Laws and List of Members ix
Proceedings of the Mineralogical Society for 1964 xlix
J. R. Cann: Gyrolite and reyerite from 'S Airde Beinn, northern Mull . 1
A. A. Hodgson, A. G. Freeman, and H. F. W. Taylor: The thermal decomposition of crocidolite from Koegas, South Africa . . . 5
J. H. Patterson: The thermal decomposition of crocidolite in air and in vacuum 31
T. Isaacs: A study of uvarovite 38
Subrata Ghose: A scheme of cation distribution in the amphiboles . 46
J. J. Fawcett: Alteration products of olivine and pyroxene in basalt lavas from the Isle of Mull 55
A. Horrell Clark: Rhombohedral molybdenite from the Minas da Panasqueira, Beira Baixa, Portugal 69
R. J. Davis, M. H. Hey, and A. W. G. Kingsbury: Xanthiosite and aerugite (Plate I) 72
E. Sass, Y. Nathan, and A. Nissenbaum: Mineralogy of certain pyrite concretions from Israel and their alteration products . . . 84
J. Esson, R. H. Stevens, and E. A. Vincent: Aspects of the geochemistry of arsenic and antimony, exemplified by the Skaergaard intrusion . 88
J. G. D. Steyn: The identification, mode of occurrence, and quantitative determination of crystalline phases in granulated blast-furnace slag (Plates II–VI) 108
N. K. Rao and G. V. U. Rao: Intergrowths in ilmenite of the beach sands of Kerala 118
D. R. Dasgupta: Oriented transformation of manganite during heat treatment 131
R. L. Oliver and J. B. Jones: A chlorite–corundum rock from Mount Painter, South Australia 140
D. L. Salter and Ian M. West: Calciostrontianite in the basal Purbeck beds of Durlston Head, Dorset 146
W. W. Smith Aitken: An occurrence of phlogopite and its transformation to vermiculite by weathering (Plate VII) 151
S. G. Fleet and P. H. Ribbe: An electron-microscope study of peristerite plagioclases 165
W. F. Bush and W. O. Williamson: Enhanced production of magnesium silicates from strained magnesia 177
G. W. Brindley and Ryozo Hayami: Mechanism of formation of forsterite and enstatite from serpentine 189
J. H. Fang and R. E. Newnham: The crystal structure of sinhalite . 196
Ian Nichol and Roy Phillips: Measurements of spectral reflectivity of manganese oxides 200
Bartolomeo Baldanza: Italian meteorites 214
M. Atherton and E. Harrison: A note on feed and asymmetric devices for mineral separation 233
A. Hall: The occurrence of prehnite in appinitic rocks from Donegal, Ireland 234
F. A. Shams: Hydromagnesite from Hindubagh, Zhob Valley, West Pakistan 236
Book reviews 237

[No. 270, JUNE 1965]

G. J. H. McCall: A meteorite of unique type from Western Australia: The Mount Egerton stony-iron 241
R. P. Miller and R. A. Mercer: The high-temperature behaviour of beryl melts and glasses 250
P. M. Harris: Pandaite from the Mrima Hill niobium deposit (Kenya) . 277
A. A. Hodgson: The thermal decomposition of miscellaneous crocidolites 291
R. A. Binns: The mineralogy of metamorphosed basic rocks from the Willyama complex, Broken Hill district, New South Wales. Part I. Hornblendes 306
L. S. Dent Glasser and Ian B. Smith: Topotaxy in the system MnO–O–H_2O: groutite–ramsdellite–pyrolusite 327
Kurt von Gehlen and Horst Piller: Optics of hexagonal pyrrhotine ($\sim Fe_9S_{10}$) 335
P. Gay: Some crystallographic studies in the system $CaSO_4$–$CaSO_4.2H_2O$. I. The polymorphism of anhydrous $CaSO_4$ 347
P. Gay: Some crystallographic studies in the system $CaSO_4$–$CaSO_4.2H_2O$. II. The hydrous forms 354
D. S. Sutherland: Potash-trachytes and ultra-potassic rocks associated with the carbonatite complex of the Toror Hills, Uganda. . . 363
V. Dadák and F. Novák: Tin-containing andradite from Plavno mine in the Krušné Hory Mts., Czechoslovakia 379
Y. Nathan, A. Katz, and M. Eyal: Garnets from the Eilat area, southern Israel 386
M. S. Murty: Feldspars and pyroxenes from the charnockite series of Visakhapatnam area, Andhra Pradesh, India 393
D. I. J. Mallick: Porphyroblastic adularia from Shimabala, Zambia . 401
Beryl Nashar and Ralph Basden: Solubility of basalt under atmospheric conditions of temperature and pressure 408
N. Joel: Determination of the optic axes and 2V: electronic computation from extinction data 412
J. Tarney and E. D. Lacy: An improved water cell for the Emmons double-variation procedure 418
C. J. Elliott and A. A. Moss: Natural glass from Macusani, Peru. . 423
A. W. G. Kingsbury: Tellurbismuth and meneghinite, two minerals new to Britain 424
A. Bhaskara Rao: Note on the d.t.a. study of some rare Brazilian phosphate minerals 427
A. Bhaskara Rao: Scorodite from Brazil 428
P. Bayliss and P. A. Males: The mineralogical similarity of precious and common opal from Australia 429
M. G. Chakrapani Naidu, R. Jagadiswara Rao, and K. V. Subbarao: Berek compensator 431
Book reviews 433

[No. 271, SEPTEMBER 1965]

A. A. Hodgson, A. G. Freeman, and H. F. W. Taylor: The thermal decomposition of amosite 445
R. G. J. Strens: Stability and relations of the Al–Fe epidotes. . . 464
G. J. H. McCall: New material from, and consideration of, the Dalgaranga meteorite and crater, Western Australia 476
R. H. Vernon: Plagioclase twins in some mafic gneisses from Broken Hill, Australia 488
N. N. Roy: The mineralogy of the potassium-barium feldspar series: I. The determination of the optical properties of natural members . 508

A. J. Burger, O. von Knorring, and T. N. Clifford: Mineralogical and radiometric studies of monazite and sphene occurrences in the Namib desert, South-West Africa 519
R. L. Grasty and C. Leelanandam: Isotopic ages of the basic charnockite and khondalite from Kondapalli, Andhra Pradesh, India . . 529
M. P. Jones: A continuous, laboratory-size density separator for granular materials 536
E. A. Jobbins, G. A. Sergeant, and B. R. Young: X-ray and other data for mellite. 542
A. H. van der Veen: Calzirtite and associated minerals from Tapira, Brazil 544
R. G. J. Strens: Instability of the garnet $Ca_3Mn_2'''Si_3O_{12}$, and the substitution $Mn''' \rightleftharpoons Al$ 547
P. C. Rickwood: A three-axis universal clamp for re-orientation of rocks in the laboratory 550
Duncan McConnell: Deriving the formula of a mineral from its chemical analysis 552
Book reviews 554

[No. 272, DECEMBER 1965]

R. A. Binns: The mineralogy of metamorphosed basic rocks from the Willyama complex, Broken Hill district, New South Wales. Part II. Pyroxenes, garnets, plagioclases, and opaque oxides (Plates VIII and IX) 561
A. J. Perrota and J. V. Smith: The crystal structure of kalsilite, $KAlSiO_4$ 588
C. M. B. Henderson: Minor element chemistry of leucite and pseudoleucite 596
J. B. Wright and J. F. Lovering: Electron-probe micro-analysis of the iron-titanium oxides in some New Zealand ironsands . . . 604
J. B. Alexander and B. H. Flinter: A note on varlamoffite and associated minerals from the Batang Padang district, Perak, Malaya, Malaysia 622
A. Hall: The origin of accessory garnet in the Donegal Granite . . 628
D. R. Dasgupta: The transformation of ankerite during thermal treatment 634
M. J. Frost: Kamacite plate estimation in octahedrites 640
Bibhuti Mukherjee: Crystallography of psilomelane, $A_2X_6Mn_8O_{16}$. 643
Hedley G. Wright: The petrographic use of the spindle stage and focal-plane screening in the determination of the optical variation of some minerals 656
B. E. Leake and F. C. Phillips: Triplite from Rhodesia 661
M. N. Balasubrahmanyan: Note on kornerupine from Ellammankovilpatti, Madras, India 662
K. C. Chandy: An occurrence of wüstite 664
K. C. Chandy: Thermal transformation of β-ferric oxyhydroxide . . 666
F. A. Shams: An occurrence of kyanite pseudomorphs after andalusite from Amb state, West Pakistan 669
Book reviews 671

[No. 273, MARCH 1966]

Sir Arthur Russell 673
D. Shelley: The significance of granophyric and myrmekitic textures in the Lundy Granites 678
A. Hall: The alkali feldspars of the Ardara pluton, Donegal . . 693

D. R. C. Kempe: A note on the $\bar{2}01$ spacing of some lime-rich alkali feldspars from Kangerdlugssuaq, East Greenland 704
Roger G. Burns: Origin of optical pleochroism in orthopyroxenes . . 715
J. R. Butler and W. Skiba: The use of An and Sr data on plagioclase in a study of basic xenoliths in a gabbroic mass at Hamar, Somalia . 720
D. S. Buist, A. M. M. Gadalla, and J. White: Delafossite and the system Cu–Fe–O 731
R. S. Bradley, P. Engel, and D. C. Munro: Subsolidus solubility between $R_2^{\cdot\cdot}SiO_4$ and $LiR^{\cdot\cdot\cdot}PO_4$; a hydrothermal investigation . . 742
R. Phillips and P. M. D. Bradshaw: A test of the linearity of a photomultiplier used for reflectivity measurement 756
S. K. Sen and S. M. Rege: Distribution of magnesium and iron between metamorphic pyroxenes from Saltora, West Bengal, India . . 759
M. Munro: The measurement of large optic axial angles with the universal stage 763
T. R. Sarbadhikari and Santi Bhattacherjee: Secondary clay in the Rajmahal basalts of India and its relation to palagonite–chlorophaeite 770
D. R. Dasgupta, A. K. Datta, and N. R. Sen Gupta: Occurrence of scorodite in a pegmatite in Bhilwara district, Rajasthan, India. . 776
R. G. J. Strens: The axial-ratio-inversion effect in Jahn-Teller distorted octahedra in the epidote and perovskite structures . . . 777
L. Favretto: Authigenic ferriferous aragonite from bottom sediments of the Adriatic Sea 781
A. Bhaskara Rao and Maria S. Adusumili: Leucophosphite and barbosalite from north-east Brazil 784
A. Bhaskara Rao and Maria S. Adusumili: Bismuth minerals from Borborema region, Brazil 785
R. J. Howarth: Calculation of mineral unit cell contents: Fortran computer programme 787
M. H. Hey, R. W. LeMaitre, and B. C. M. Butler: A versatile computer programme for the recalculation of rock and mineral analyses. . 788
Book reviews 789

[No. 274, JUNE 1966]

Michael Fleischer: Rare earths in the aeschynite–priorite series. The status of lyndochite 801
D. G. W. Smith and J. D. C. McConnell: A comparative electron-diffraction study of sillimanite and some natural and artificial mullites (Plates X and XI) 810
G. A. Kingston: The occurrence of platinoid bismuthotellurides in the Merensky Reef at Rustenburg platinum mine in the western Bushveld (Plate XII) 815
P. Černý: A new Czechoslovak occurrence of stokesite . . . 835
D. A. Stephenson, C. B. Sclar, and J. V. Smith: Unit cell volumes of synthetic orthoenstatite and low clinoenstatite 838
J. F. G. Wilkinson: Residual glasses from some alkali basaltic lavas from New South Wales 847
P. M. D. Bradshaw, R. Phillips, and R. A. Smith: A new method for the absolute measurement of reflectivity 861
S. Chatterji and J. W. Jeffery: On the oriented conversion of $Ca(OH)_2$ to CaO 867
D. F. C. Morris and E. L. Short: Minerals of rhenium . . . 871
G. R. Basson: Note on the crystallization of merwinite from glass of åkermanite composition 873
Book reviews 875

[No. 275, SEPTEMBER 1966]

E. A. Jobbins, F. G. Dimes, R. A. Binns, M. H. Hey, and S. J. B. Reed: The Barwell meteorite 881
H. G. Scharbert: The alkali-feldspars from microsyenitic dykes of southern Greenland 903
Robert C. Newton: BeO in pegmatitic cordierite 920
R. G. J. Strens: Properties of the Al–Fe–Mn epidotes 928
R. Phillips: Amphibole compositional space 945
A. G. Freeman: The dehydroxylation behaviour of amphiboles . . 953
Ernest G. Ehlers: A simplified method of 2V determination using 3- and 4-axis stages 958
D. C. Gellatly: Graphite in natural and experimental carbonate systems 963
Bibhuti Mukherjee: Psilomelane from India 971
A. Hall: The feldspars of the Rosses Granite Complex, Donegal, Ireland 975
B. A. O. Randall and J. M. Jones: Sideronatrite from mineralized cavities in the Rising Sun colliery, Backworth, Northumberland . 983
W. R. Dearman: Rhodonite from Meldon, Okehampton, Devonshire . 991
A. J. Easton and A. A. Moss: The analysis of molybdates and tungstates 995
D. W. Williams: Externally-heated cold-seal pressure vessels for use to 1200° C at 1000 bars 1003
A. Livingstone and N. Cogger: A new British locality for beudantite: Sandford Hill, Somerset 1013
W. R. Dearman: Datolite from Meldon, Okehampton, Devonshire . 1017
M. N. Saxena: Lamellae of uncertain origin in the gem garnets from Simla village, Jhunjhunu district, Rajasthan, India 1018
U. Aswathanarayana: Isotopic ages of charnockites and other Indian rocks 1020
Book reviews 1022

[No. 276, DECEMBER 1966]

G. J. H. McCall: The petrology of the Mount Padbury mesosiderite and its achondrite enclaves 1029
J. F. G. Wilkinson: Clinopyroxenes from the Square Top intrusion, Nundle, New South Wales 1061
Jan Kubisz: On the existence of hydronium hydrates $H_9O_4^+$ and $H_{15}O_7^+$ in minerals 1071
M. J. Wilson: The weathering of biotite in some Aberdeenshire soils (Plate XIII) 1080
Derek Powell: On the preferred crystallographic orientation of garnet in some metamorphic rocks. 1094
G. M. Biggar: Experimental studies of apatite crystallization in parts of the system $CaO–P_2O_5–H_2O$ at 1000 bars 1110
A. Horrell Clark: Heating experiments on gudmundite 1123
M. H. Hey: Twenty-fourth list of new mineral names 1126
R. H. Verschure and L. IJlst: The 'infracentrifuge', a device for continuous separation of heavy minerals 1165
Topographical index. 1168
Alphabetical index 1172

LIST OF PLATES

		FACING PAGE
Plate I.	Xanthiosite and aerugite (Davis, Hey, and Kingsbury)	82
„ II–VI.	Determination of slag minerals (Steyn) . . .	116
„ VII.	Phlogopite and vermiculite (Aitken) . . .	164
„ VIII and IX.	Willyama metamorphic complex minerals (Binns) .	586
„ X and XI.	Sillimanite and mullite (Smith and McConnell). .	814
„ XII.	Platinoid bismuthotellurides (Kingston) . . .	834
„ XIII.	Weathering of biotite (Wilson)	1092

ERRATA AND ADDENDA

Vol. 19, page 56 footnote 4 *For* vol. 1, p. 515 *read* vol. 1, p. 315.

Vol. 23, page 587 line 2* *For* Arkwright and Rutland mines *read* Arkwright mine

Vol. 31, page 964 lines 2*, 3*, and 10* *For* Labuntzov, Labuntzovite *read* Labuntsov, Labuntsovite

Vol. 32, page 953 line 24 *For* vol. 70, p. 70 *read* vol. 79, p. 70

1005 *After* line 9 *left insert*: Diamond, synthetic, 185

Vol. 33, page viii line 31 *For* Hether Water mine *read* Nether Water mine

1132 line 13 *For* Dzhezkazgab *read* Dzhezkazgan

1161 line 22 For *St. Just-in-Roseland* read *St. Just-in-Penwith*

1161 line 1* For *Red Rake, Culver* read *Red Rake, Calver*

1161 *After* line 8 *right insert*: *Engine vein, Alderley Edge, Cheshire*: sulphur, campylite, viii

1161 *Under* Derbyshire *insert*: *Dene quarry, Cromford*; sulphur, viii: also *Nether Water mine, Hazlebadge*; hydrozincite, sulphur, viii

1162 *After* line 22 *left insert*: *Tyndrum mine, Tyndrum, Perthshire*; sulphur, viii

1166 *Before* line 1* *left insert*: Heide (F.) Meteorites, 1056

1167 *After* line 10 *right insert*: Braithwaite (R. S. W.) and Ryback (G.), Sulphur from *Perthshire, Cheshire,* and *Derbyshire,* campylite from *Cheshire,* and hydrozincite from *Derbyshire,* viii

Vol. 34, page 370 line 6 of Summary, *also* p. 372, line 19 *For* γ 108° 72′ *read* γ 108° 42′

372 *Add to* Acknowledgements: The X-ray data referred to as supplied by the Royal Ontario Museum were originally published by Ann P. Sabine and R. J. Traill, Geol. Surv. Canada paper 60–4 (1960).

Vol. 35, page 72 to 83 *For* 1963,507, 1963,508, *and* 1963, 509, *read* 1964 *throughout*

78 Table III, note 1 *For* 1907 173 *read* 1907, 103

407 *After* line 3 *insert*: *Acknowledgements.* My thanks are due to Professor W. Q. Kennedy, Research Institute of African Geology, University of Leeds, for his help during the work and to Dr. G. Hornung for the chemical analysis. I am also grateful for the financial assistance provided by the Anglo-American Corporation of South Africa.
